

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-10. (canceled)

11. (new) A wall support for a TV set, comprising a first plate adapted to be fixed to a wall, a second plate articulated to said first plate for vertical swinging movement relative to said first plate, and a third plate articulated to said second plate for vertical swinging movement about a horizontal axis adjacent the lower portion of said second plate, and means for mounting said TV set on said third plate.

12. (new) The wall support of claim 11, said means mounting said second plate for vertical swinging movement on and relative to said first plate, comprising two arms mounted for horizontal swinging movement on said first plate and disposed one above the other, means mounting said arms on said first plate about spaced vertical axes such that one of said arms swings horizontally about a first one of said vertical axes and the other of said arms swings horizontally about the other of said vertical axes, said second plate being selectively swingable with either of said first and second arms.

13. (new) A wall support for a TV set, comprising a first plate adapted to be fixed to a wall, a second plate

articulated to said first plate for vertical swinging movement relative to said first plate, and a third plate articulated to said second plate for vertical swinging movement about a first horizontal axis adjacent the lower portion of said second plate, and means for mounting said TV set on said third plate, said means for mounting said TV set on said second plate comprising means rotatable relative to said second plate about a second horizontal axis transverse to said first horizontal axis, and means for selectively fixing said mounting means in any of a plurality of rotated positions.

14. (new) A wall support for a TV set, comprising a first plate adapted to be fixed to a wall, a second plate, means for mounting said TV set on said second plate, and means mounting said second plate for horizontal swinging movement on and relative to said first plate, comprising two arms mounted for horizontal swinging movement on said first plate and disposed one above the other, means mounting said arms on said first plate about spaced vertical axes such that one of said arms swings horizontally about a first one of said vertical axes and the other of said arms swings horizontally about the other of said vertical axes, said second plate being selectively swingable with either of said first and second arms.
